### Service information

If you need more technical support, please call us or send us an email. We are happy to serve you.

## Version record

Version number	Version description	Version date
LW-1.10A	Initial version	2017-12-12
LW-1.10E 20 : 52 : 52 Jan 24 2018	1. Add small language keyboard setting barcode; 2. The virtual Bluetooth mode setting the barcode; 1、 3. HID search setting the barcode.	2018-02-05
SW:LW-1.10M 17:24:17 Apr 11 2018 Boot: 1.02A	Repair cannot be reconnected automatically	2018-6-30
SW:LW-1.16A 17:40:05 Aug 29 2018 Boot: 1.04A	Fix automatic adaptation	2018-8-30
SW:LW-1.17B 17:13:18 Sep 27 2018 Boot: 1.04A	1, Repair upload menu data 2, Increase the Belgian French keyboard 3, Increase the ending suffix Tab 4, Increase the cast large, lowercase and no conversion case	2018-9-28
SW:LW-1.17D 12:40:19 Nov 06 2018 Boot: 1.04A	Fix bugs, BLE mode sometimes fails	2019-1-5
SW:LW-1.18B.17 : 27:56 Mar 15 2019 Boot: 1.05A	Modify the settings menu (no need to read the settings and exit settings)	2019-3-29
SW:LW-1.19B 10:23:47 May 20 2019 Boot: 1.05A	Add control character escaping Add more hidden byte number setting code Add UPC-A to EAN-13 Add UPC-E to UPC-A	2019-05-21

	Add UPC/EAN/JAN additional code Add EAN to ISBN Add EAN to ISSN Can support 1D barcode unlimited length setting Add support for reverse barcodes Add codeID Add AIM ID Add Control character escaping Add induction function	
SW:LW-1.19C 16:58:20 Aug 15 2019  Boot: 1.04A	Disconnection will occur at a specific length in the repair BLE mode	2019-10-30

## 1. Product Introduction

This user guide applies to P2000 which apply the complete set of patent technology developed by our company. The scanners above are of strong identification capability and support automatic continuous scanning mode with fast and flexible scanning speed.

In this chapter, we will introduce the instruction of scanner with pictures, please compare to the scanner you bought when reading this user guide, which is good for your understanding. This chapter applies to regular users, maintenance personnel, and software developers.

### 1.1 Main feature

- \* Supports computer, mobile screen scanning
- \* Easy to operate and master
- \* Rich decoding types
- \* Supports invoice function

### 1.2 Unpack your device

After you open the shipping carton containing the product, take the following steps:

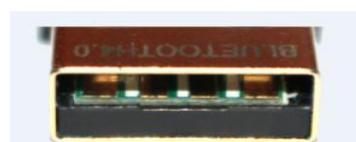

- Take the accessories for scanner out from package.
- Check with the packing list to see if everything is complete and in good condition. If there are any damaged or missing components, please keep the original package and contact your supplier for after-sales service.

### 1.3 Communication port

The scanner must be connected to a host to operate. Host can be a PC, POS machine, intelligent terminal with USB interface.

USB

USB interface on host

### 1.4 LED indicator light

Indicator status	Explain
Red light on	Charging
Red light off	No charging

Green light on	No decoding
Green light off	Decode successfully
One blue light on	Pairing successful or connect to USB
Two blue light twinkle alternately	Bluetooth HID pair mode

### 1.5 Start-up, shutdown, standby and restart

Start-up: Connect host computer with scanner, which will automatically start-up and in working state.

Shutdown: Remove the data cable which is connected with scanner; remove the USB which is connected with host computer;

Restart: If the product crash or no response when pressing button, please restart it.

### 1.6 Maintenance

- \* The window must be kept clean, the supplier do not bear the guarantee responsibility due to the improper maintenance.
- \* Avoid the window being wear and tear or scratched by hard object
- \* Use the hairbrush to remove the stain on the window
- \* Clean the window with a soft cloth, such as lens cleaning cloth
- \* Spraying liquid onto the window is prohibited.
- \* Prohibit any cleaning solvents, except for the cleaning water.

### 1.7 Reading skills

If the barcode is small, it should be closer to the scanning window; if the barcode is large, it should be far away from the scanning window a little more, thus easier to be read correctly.

If the barcode is highly reflective (for example, the coated surface), you may need to tilt the barcode at an angle to successfully scan it.

#### Barcode scanning example:

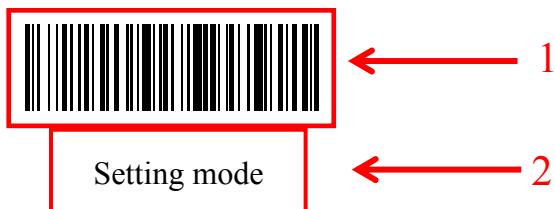

---

## 1.System setting

This model of laser desktop barcode scanner is designed to change settings by reading some special barcode, which we will give you a detailed introduction and show you all the barcodes for the corresponding setting in this section.

The greatest advantage of this setting method is direct, intelligible and user friendly.

### 2.1 Mark Setting

This is the mark for setting up the barcode function of the mode.

- 1.The mark consists of two parts;
- 2.Barcode Section of Setting Code;
- 3.Set the name of an option or function, such as the function of the setup mod。

### 2.2 Basic barcode setting

#### 2.2.1 Bluetooth virtual mode

A: Press the button to start the scanner. After the startup is successful, the green indicator light is always on;

B: Scan the Bluetooth Virtual Mode barcode below

Bluetooth Virtual Mode

C: Scan the bar code below to Enter pairing status. After successfully entering the virtual pairing mode, the right blue LED will flash.

Enter Pairing Status

D:Connect the receiver to a computer or other device. After the pairing is successful, the buzzer will beep and the blue light on the right will be on.

### **2.2.2 Bluetooth HID Mode:Match with Android, iOS mobile phone or PC**

#### **Method 1: Manually enter the Bluetooth HID mode**

A:Press the button to start the scanner. After the startup is successful, the green indicator light is always on;

B:Long press the button for 8 seconds,enter Bluetooth HID pairing mode,After successfully entering the HID pairing mode, the buzzer will sound “deep” and the blue indicators on the left and right sides will flash alternately;

C: Turn on Bluetooth on the receiving device and search for "Barcode Scanner HID";

D: Click on the Bluetooth device "Barcode Scanner HID" to pair;

E:After the pairing is successful, the buzzer will “deep” once and the blue indicator on the left will be on.

#### **Method 2: Scan into Bluetooth HID mode**

A:Press the button to start the scanner. After the startup is successful, the green indicator light is always on.

B: Scan the "Bluetooth HID Mode" barcode below

Bluetooth HID Mode (Default)

---

C: Scan the barcode below to enter the pairing status, after successfully entering the HID pairing mode, the blue indicator flashes alternately after the buzzer “deep”.

Enter Pairing Status

D: Turn on Bluetooth on the receiving device and search for "Barcode Scanner HID";

E: Click on the Bluetooth device "Barcode Scanner HID" to pair;

F: After the pairing is successful, the buzzer will “deep” once and the blue indicator on the left will be on.

### **2.2.3 Bluetooth SPP mode:Android device or PC-side enterprise or private customized Bluetooth serial port software**

A: Press the button to start the scanner. After the startup is successful, the green indicator light is always on;

B: Scan the “Bluetooth SPP Mode” barcode below. After successfully entering the Bluetooth SPP mode, the blue light on the left will flash.

Bluetooth SPP Mode

C: Turn on Bluetooth in the receiving device and search for "Barcode Scanner SPP";

D: Click on the Bluetooth device "Barcode Scanner SPP" to pair;

E: After the pairing is successful, the buzzer will “deep” once and the blue indicator on the left will be on;

### **2.2.4 Bluetooth BLE mode:IOS device enterprise or private customized**

A: Press the button to start the scanner. After the startup is successful, the green indicator light is always on.

---

---

B: Scan the following “Bluetooth BLE Mode” barcode; successfully enter the Bluetooth BLE mode, the blue LEDs on both the left and right sides flash at the same time.

Bluetooth BLE Mode

- C: Open Bluetooth in the receiving device and search for Barcode Scanner BLE;
- D: Click on the Bluetooth device "Barcode Scanner BLE" to pair;
- E: After the pairing is successful, the buzzer will “beep” once, and the blue LEDs on both the left and right sides will be on at the same time;

### 2.2.5 Bluetooth personality setting

Choose the personalized bar code you need (please operate carefully before you read the following instructions, thank you);

How to set the Bluetooth name: first scan the Bluetooth name barcode, then scan a barcode.

This barcode will be set to the name of the Bluetooth.

Note: a) The name can only be set up to 16 bytes, if the name barcode exceeds 16 bytes, the scanner only takes the first 16 bytes as the Bluetooth name.

b) The full Bluetooth name includes: Bluetooth Name + Protocol Type, only Bluetooth name modification is supported. After modifying the Bluetooth name, the names of all Bluetooth protocols have changed.

For example: If the Bluetooth name is set to: Scanner, the name of the Bluetooth HID is: Scanner HID, The name of the SPP is: ScannerSPP, and the name of the BLE is: ScannerBLE;

Set The Bluetooth Name

---

---

Query current Bluetooth name:

Read Bluetooth Name

The following barcodes will take effect in any mode:

Long Presses To Enter BTH HID Search

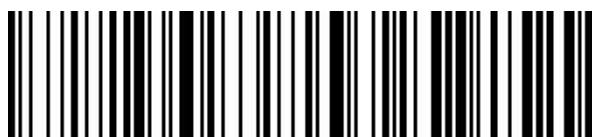

Disable Long Press Enter Bluetooth HID Search

Note: When the Bluetooth HID connection is successful and the keyboard is English, double-click can pop up/hide the keyboard. (Effective in IOS system)

Keyboard Pop-Up/Hide In Bluetooth HID Mode

Close Button Double-Click On The Keyboard To Pop/Hide

Open The Button And Double-Click The Keyboard To Pop/Hide (Default)

#### **2.2.6 Real-time mode**

In real-time mode, the scanned data is transmitted directly to the computer via wired or wireless, if the transmission is successful, the scanner will emit a low-frequency short tone and the green indicator will flash once.

If the transmission fails, three low-frequency short tones are issued to warn, and the green light flashes three times.

Enter Real-Time Mode (Default)

#### **2.2.7 Warehousing mode**

If the scanner works beyond the wireless transmission range, the storage mode is recommended. In storage mode, the scanned data is stored in the scanner's internal storage.

In the storage mode, after scanning a bar code, the scanner will emit a short tone (the frequency is low first and then high). At the same time, the green light flashes once and the scanned bar code is automatically stored in the scanner.

If the internal memory is full, the scanner will emit 3 low-frequency short tones and the green light will flash 3 times.

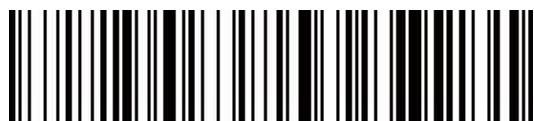

Enter Storage Mode

View the number of barcodes stored in the warehouse by scanning the “Show Total Storage Items” barcode.

Display Total Storage Entries

Upload storage data by scanning the “Data Upload” barcode, barcodes stored in the scanner after data upload are not automatically deleted. The user uploads the storage data multiple times by scanning the "data upload".

Data Upload

Note: Please try to ensure that the wireless signal connection is good when uploading data, or upload with the data cable connected.

Clear barcode data in the warehouse by scanning the “Clear all stored Data” barcode. After the barcode is cleared, it will not be uploaded again. Please confirm whether the data has been uploaded before clearing.

Clear All Stored Data

### 2.2.8 Initialization Setting

If you accidentally scan other function setting codes during use, resulting in the scanning function not working properly, you can restore the initialization status by scanning the initialization bar code.

Restore Factory Settings

---

## 2.2.9 Version Setting

Read Version Information

## 2.2.10 Communication Mode Switching

Select the required communication mode bar code (mode three choices one);

Bluetooth HID Mode (Default)

Bluetooth SPP Mode

Bluetooth BLE Mode

Bluetooth Virtual Mode

## 2.2.11 Time Out Setting

Select Time Out Interval Barcode

Time Out 30S (Default)

Time Out 1 Minute

Time Out 5 Minutes

Time Out 10 Minutes

Time Out 30 Minutes

No Time Out

Time Out Immediately

Display Batter

---

## 2.3 Sounds Setting

### 2.3.1 Volume Setting

Volume Low

Mute

Volume High (Default)

Volume Middle

### 2.3.2 Buzzer Frequency Setting

Buzzer Frequency 2K

Buzzer Frequency 2.7K

## 2.4 Language Setting

Select The Required Language Keyboard

English (Default)

German

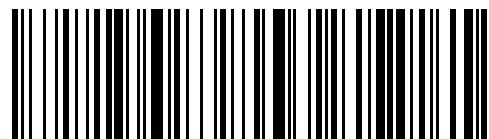

French

Spanish

Italian

Japanese

International General Keyboard

Belgian French

---

## 2.5 Transmission Speed Setting

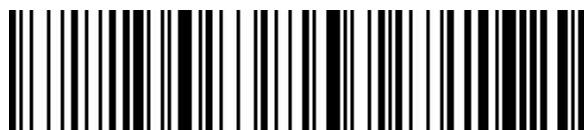

Select the required transmission speed (speed selection is related to reading barcode);

Fast Transmission

Medium Speed Transmission (Recommended For Use In IOS System Bluetooth Mode)

Low Speed Transmission (Recommended For Bluetooth Mode In Android)

Ultra Low Speed Transmission (Recommended Test Mode Used)

## 2.6 Add Ending Character Setting

Select The End You Want To Add;

Add Enter At The End

Add Line Breaks At The End

Add Enter And Line Breaks At The End(Default)

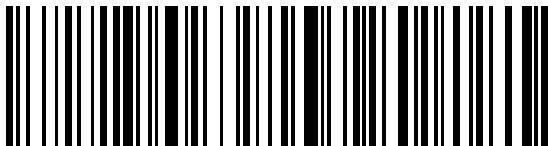

Add Tab At The End

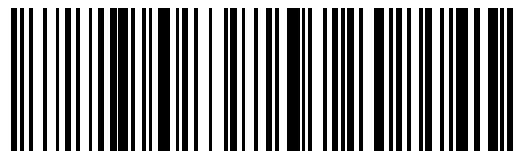

End Does Not Add

## 2.7 Add Prefix/Suffix

Method of adding prefix and suffix:First scan to add prefix or suffix, then scan the corresponding barcode (see appendix), up to 32 bytes.

Add Prefix

Add Suffix

## 2.8 Hide Prefix/Suffix

Method of hiding prefixes and suffixes:First scan the hidden prefix or suffix, then scan the hidden bits, hiding up to 16 bytes.

Hidden Barcode Prefix

Hidden Barcode Suffix

Hide 1 bit

Hide 2 bit

Hide 3 bit

Hide 4 bit

Hide 5 bit

Hide 6 bit

Hide 7 bit

Hide 8 bit

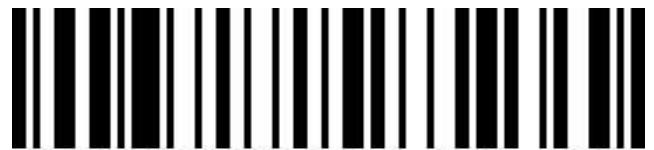

Hide 9 bit

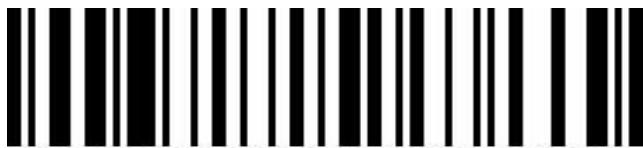

Hide 10 bit

Hide 11 bit

Hide 12 bit

Hide 13 bit

Hide 14 bit

Hide 15 bit

Hide 16 bit

---

## 2.9 Control Character Escaping

Open Control Character Escaping

Close Control Character Escaping ( Default )

## 2.10 GS, FS Character Barcode Setting

Open GS, FS Symbol To Convert to |

Turn off GS, FS Symbol To | (Default)

---

## 2.11 USB Keyboard Case Output Control

Force Conversion To Uppercase

Force Conversion To Lowercase

Case Interchange

No Case Conversion (Default)

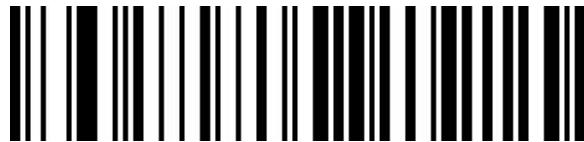

## 2.12 Product User Configuration

Scan the barcode below to save the current parameters of the product as a user configuration.

Save User Configuration

Scan the barcode below to restore the product to a saved user configuration

Restore User Configuration

## 2.13 Output Encoding Format

In order to output correctly according to the specified encoding format, you need to specify the output encoding format, such as Simplified Chinese in Notepad / excel output configuration into GBK encoding.

When the output encoding format is configured as English/Latin-1 encoding,The output mode under the USB keyboard is affected by the virtual keyboard function switch.

When the output encoding format is configured as GBK encoding / UNICODE encoding,The output mode under the USB keyboard is forced to be the virtual keyboard output.

English/Latin-1 Encoding (Default)

**GBK Coding (Notepad/Excel)**

---

## 2.14 Invoice Function

Open/Close Invoice Function

Turn Off Invoice Function (Default)

Turn On Invoice Function

**In order to ensure the correct output of the invoice content, when opening the invoice code function, please configure the Chinese character output mode to GBK code (Notepad/excel) ,At the same time, the function of changing the original content of the barcode, such as CodeID, custom pre/suffix, and start character, is turned off.**

Invoice Type Selection

Special Invoice (Default)

General Lnvoice

---

## 2.15 Scan Mode

This product has a self-inductive scan code mode. Scan the barcode below to configure the switch.

When the self-sensing mode is configured to be off, pulled the trigger of the scanner to decode. This mode is the default configuration.

Automatic Induction Mode Off (Default)

When the self-sensing mode is configured to be on, the scanner can automatically sense the barcode in front of the lens for decoding.

Self-Sensing Mode Turn On

## 2.16 Repeated Code Detection

In induction mode, it is used to configure the interval time for solving the same barcode. If the setup time is not exceeded, the same barcode will only be solved once.

Repeat Code Detection Interval 500s

Repeat Code Detection Interval 750s (Default)

Repeat Code Detection Interval 1s

Repeat Code Detection Interval 2s

## 2.17 Screen Reading Mode

When this mode is turned on, your scanner will be optimized to read the bar code displayed on the display such as your phone or computer. However, turning this mode on may result in a slight decrease in the speed at which the printed bar code is read.

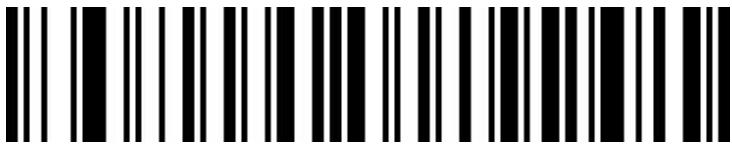

Screen Reading Mode Off (Default)

Screen Reading Mode Turn On

## 2.18 Center Mode

When the center mode is on, the scanner will only recognize the bar code located in the center of the screen to which the scanner lens is facing. By default, this configuration is in a closed state.

Central Mode Off (Default) )

Central Mode Turn On

## 2.19 Code ID Output Option Setting

Turn Off CODE ID (Default)

Open Barcode Front CODE ID

Open Barcode Latter CODE ID

## Edit

Custom CODE ID

(Please follow the barcode type ID table and data and edit barcode in the appendix after scanning)

Clear All Custom CODE ID

## 2.20 AIM ID Code Setting

Turn Off Barcode AIM ID (Default)

Open Barcode Front AIM ID

Open Barcode Latter AIM ID

## 2.21 Inverse Code Option

(Only 1D/DataMatrix/Aztec)

Only Decode Normal Code (Default)

Only Decode Inverse Code

Decode Both Normal Code And Inverse Code

## 2.22 Barcode Type Selection

### 2.22.1 Turn All Barcode Settings On/Off

Opening all bar code types may result in slower decoding speed. It is recommended to open the required bar code type according to the usage scenario. The default is to turn on all bar codes

Open All Barcode Types (Default)

Close All Barcode Types

### 2.22.2 Turn All 1D Barcode Settings On/Off

Open All 1D Barcode

Close All 1D Barcode

#### 2.22.3 Turn All 2D Barcode Settings On/Off

Open All 2D Barcode

Close All 2D Barcode

#### 2.22.4 Codabar On/Off Setting

Codabar Turn On

Codabar Off

---

## 2.22.5 Codabar Start/Ending Character Setting

Do Not Send Codabar Start/End Characters (Default)

Send Codabar Start/End Characters

## 2.22.6 Codabar Length Limit Setting

Codabar Minimum Length Limit (0~50 bits)

Codabar Maximum Length Limit (0~50 bits)

---

## 2.22.7 Code 39 Turn Barcode On/Off Setting

Code 39 Turn On

Code 39 Off

## 2.22.8 Code 39 Check Bit Setting

Code 39 Check Off (Default)

Code 39 Check Open Does Not Send Check Bit

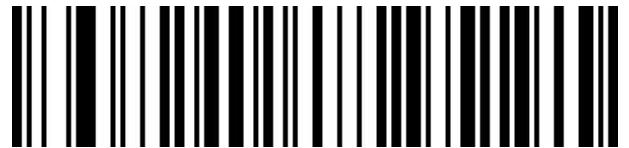

Code 39 Check Open Send Check Bit

---

## 2.22.9 Code 39 Full ASCII On/Off Setting

Full ASCII Turn On

Full ASCII Turn Off(Default)

## 2.22.10 Code 39 Length Limit Setting

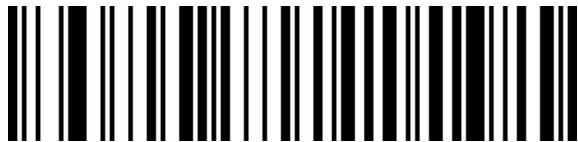

Code 39 Minimum Length Limit (0~50 bits)

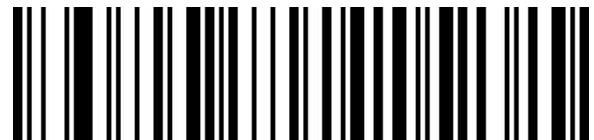

Code 39 Maximum Length Limit (0~50 bits)

---

### **2.22.11 Code 32 (need code39to open) Turn Barcode On/Off Setting**

Code 32 turn on

Code 32 off

### **2.22.12 Interleaved 2 of 5(ITF25)Turn Barcode On/Off Setting**

ITF25 turn on

ITF25 off

### **2.22.13 Interleaved 2 of 5 ( ITF25 ) Check Bit Setting**

ITF25 Check Off(Default)

ITF25 Check Open Does Not Send Check Bit

ITF25 Check Open Send Check Bit

#### 2.22.14 Interleaved 2 of 5 ( ITF25 ) length selection setting

ITF25 any length (4-24 bits) (Default)

ITF25 6-bit Length

ITF25 8-bit Length

ITF25 10-bit Length

ITF25 12-bit Length

ITF25 14-bit Length

ITF25 16-bit Length

ITF25 18-bit Length

ITF25 20-bit Length

ITF25 22-bit Length

ITF25 24-bit Length

---

### **2.22.15 Interleaved 2 of 5 Length Limit Setting**

Interleaved 2 of 5 Minimum Length Limit (0~50 bits)

Interleaved 2 of 5 Maximum Length Limit (0~50 bits)

### **2.22.16 Industrial 2 of 5(Industry 25 code)Turn barcode on/off setting**

Industrial 2 of 5 turn on

Industrial 2 of 5 off

### **2.22.17 Industrial 2 of 5 Length Limit Setting**

Interleaved 2 of 5 Minimum Length Limit (0~50 bits)

Interleaved 2 of 5 Maximum Length Limit (0~50)

#### 2.22.18 Matrix 2 of 5(matrix 25 yards) (4-24 digits)Turn barcode on/off setting

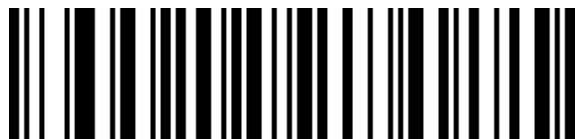

Matrix 2 of 5 turn on

Matrix 2 of 5 off

#### 2.22.19 Matrix 2 of 5 Length Limit Setting

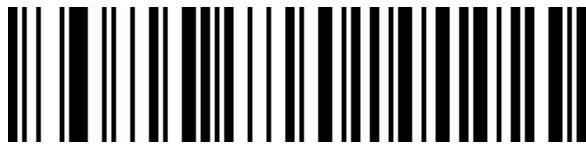

Matrix 2 of 5 Minimum Length Limit (0~50 bits)

Matrix 2 of 5 Maximum Length Limit (0~50 bits)

---

#### **2.22.20 Code 93 Turn Barcode on/off Setting**

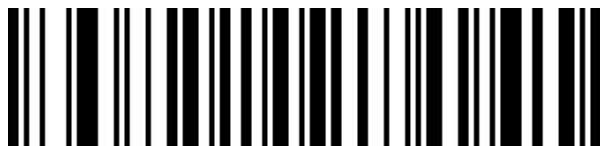

Code 93 turn on

Code 93 off

#### **2.22.21 Code 93 Length Limit Setting**

Code 93 Minimum Length Limit (0~50 bits)

Code 93 Maximum Length Limit (0~50 bits)

#### **2.22.22 Code 11 Turn Barcode on/off Setting**

Code 11 turn on

Code 11 off(Default)

#### 2.22.23 Code 11 Check bit output Turn Barcode on/off Setting

Code 11 Check Digit Output Turn On

Code 11 Check Digit Output Turn Off(Default)

#### 2.22.24 Code 11 Check Selection Setting

Code 11Chck Off(Default)

Code 11 1 bit Check

Code 11 2 bit Check

#### 2.22.25 Code 11 Length Limit Setting

Code 11 Minimum Length Limit ( 0~50 bit )

Code 11 Maximum Length Limit ( 0~50 bit )

#### 2.22.26 Code 128 Turn on/off Setting

Code 128 turn on

Code 128 off

#### 2.22.27 GS1-128 Turn on/off Barcode Setting

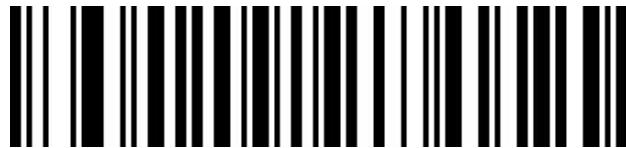

GS1-128 turn on

GS1-128 off

#### 2.22.28 128 Code Length Limit Setting

128 Code Minimum Length Limit ( 0~50 bit )

128 Code Maximum Length Limit ( 0~50 bit )

#### 2.22.29 UPC-A Turn On/Off Barcode Setting

UPC-A Turn On

UPC-A Off

#### 2.22.30 UPC-A Check Bit Setting

Send UPC-A Check Bits (Default)

Do Not Send UPC-A Check Bits

#### 2.22.31 UPC-A Turn EAN-13

UPC-A Turn EAN-13 Turn On

UPC-A Turn EAN-13 Off ( Default )

#### 2.22.32 UPC-E Turn On/Off Barcode Setting

UPC-E Turn On

UPC-E Off

#### 2.22.33 UPC-E Check Bit

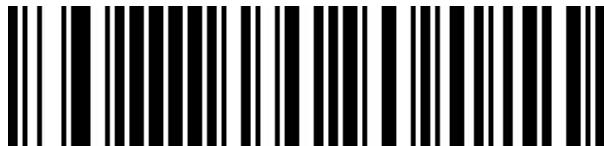

Send UPC-E Check Bits ( Default )

Do Not Send UPC-E Check Bit

#### 2.22.34 UPC-E Extend UPC-A

UPC-E Extend UPC-A Turn On

## Appendix5 AIM ID Table

Code type	AIM ID	Explain
Codabar	]Fm	m : 0~1
Code128	]C0	m : 0 , 1 , 2 , 4
Code32	]A0	
Code93	]G0	
Code39	]Am	m : 0 , 1 , 3 , 4 , 5 , 7
Code11	]Hm	m : 0 , 1 , 3 , 8 , 9
EAN-13 / EAN-8	]Em	m : 0 , 1 , 3 , 4
GS1 DataBar	]e0	
GS1-128 (EAN-128)	]C1	
Interleaved 2 of 5	]Im	m : 0 , 1 , 3
Matrix 2 of 5	]X0	
Industry 2 of 5	]S0	
UPC-A/ UPC-E	]Em	m : 0 , 3
ISBN	]X0	
ISSN	]X0	
Aztec Code	]z0	
DataMatrix	]dm	m: 0~6
PDF417 / Micro PDF417	]Lm	m: 0~5
QR Code / Micro QR Code	]Qm	m: 0~6

## Appendix6 Control Character Set (USB Keyboard Mode)

Decimal	Hex	Corresponding key value (control character escaping off)	Corresponding key value (control character escaping on)
1	01	Insert	Ctrl+A
2	02	Home	Ctrl+B
3	03	End	Ctrl+C
4	04	Delete	Ctrl+D
5	05	PageUp	Ctrl+E
6	06	PageDown	Ctrl+F
7	07	ESC	Ctrl+G
8	08	Backspace	Ctrl+H
9	09	Tab	Ctrl+I
10	0A	Enter (performance is affected by carriage return line feed processing configuration)	Enter
11	0B	Caps Lock	Ctrl+K
12	0C	Print Screen	Ctrl+L
13	0D	Enter (performance is affected by carriage return line feed processing configuration)	Ctrl+M
14	0E	F7	Ctrl+N
15	0F	F8	Ctrl+O
16	10	F11	Ctrl+P
17	11	Direction key↑	Ctrl+Q
18	12	Direction key ↓	Ctrl+R
19	13	Direction key ←	Ctrl+S
20	14	Direction key →	Ctrl+T
21	15	F12	Ctrl+U

---

---

22	16	F1	Ctrl+V
23	17	F2	Ctrl+W
24	18	F3	Ctrl+X
25	19	F4	Ctrl+Y
26	1A	F5	Ctrl+Z
27	1B	F6	Ctrl+[
28	1C	<FS>	Ctrl+\
29	1D	<GS>	Ctrl+]
30	1E	F9	Ctrl+^
31	1F	F10	Ctrl+_

## Some Feature Configuration Instructions And Examples

Barcode length limit configuration example

When configuring the barcode minimum length limit, you must ensure that the configured minimum length is not greater than the current maximum length configuration, otherwise, errors will be prompted. Similarly, when configuring the barcode maximum length limit, you must also ensure that the maximum length of the configuration is not less than the current minimum length configuration.

Example 2.1: Configuring Code 128 barcode length is 4-12 bits

Scan configuration code **Code 128 minimum length limit**, then scan the appendix data and edit the 4 in the barcode, **save** ;

Configure Interleaved 2 of 5 barcode length 14 bits to directly scan the quick configuration barcode ITF25 14-bit length configuration, or configure it with the maximum and minimum length of barcodes:

Scan configuration code **Interleaved 2 of 5 minimum length limit**, then scan the appendix data and edit the 1,4 in the barcode, **save** ;

Scan configuration code **Interleaved 2 of 5 maximum length limit**, then scan the appendix data and edit the 1,4 in the barcode, **save**; That is, the configuration is completed.

Example 2.3: Configuring Code 39 barcode length to any length supported

Scan configuration code **Code 39 minimum length limit**, then scan the appendix data and edit the 0 in the barcode, **save** ;

Scan configuration code **Code 39 maximum length limit**, then scan the appendix data and edit the 0 in the barcode, **save**; That is, the configuration is completed.
