KEY (24 Byte)

Enter the 24 bytes = 48 hexadecimal characters of the 3DES password in the first line. The appropriate length of 48 is displayed to the right.

Data (8 Byte)

Enter the user data to be processed here.

[Encrypt]/[Decrypt]

Please select the desired function.

Encrypt: Encrypt the user data with the 3DES password.

Decrypt: Decrypt the user data with the 3DES password.

Please remove all spaces!

2 Examples

2.1 Decrypting the Application Key from Chapter 2.4

Set Application Key

#	Address	Contents	Function
